

## Machine Quilting Basics

**One Day Workshop:** In this workshop, we learn how to take advantage of the speed of machine quilting without sacrificing the look of traditional hand quilting. From basting to binding, we'll cover the basics and more. Tons of information on batting, fabric, needles, threads, washing and care. **For all skill levels.**

### Supply List

Nine-patch Sampler top completed. **See other side for directions.**

**Cotton** batting, crib size or 30" square.

Backing fabric, approximate size 30" square.

Please bring your fabric and batting scraps for practice!

#### **Sewing Supplies:**

Fabric scissors

Cotton thread to match backing fabric

Invisible nylon thread-I prefer Sulky

New size 80/12 machine needles (I prefer "Sharps")

Quilter's safety pins (size 1) - opened

1" x 12" (or 18") Rotary Ruler

Masking tape

Ultimate Marking pencil *&/or* Fine line Water soluble pen

(Marking pens and pencils will be discussed in class. Bring all you have!)

**Sewing Machine** in good working order

2 bobbins wound with cotton thread

**•Required!• even feed or walking foot**

**darning foot (feed dogs must be able to drop or be covered by a plate.)**

Bring your sewing machine manual!

**Please Note:** In order to get the most out of this class it really is important to come to class with the supplies listed. **The most vital part of machine quilting is a sewing machine in good working order and the right attachments!** Please test your new attachments before class. If they don't fit, you won't be able to enjoy the class!

**Another Note:** We will need one iron and ironing board for about every 4 students.

**One Last Note:** If you arrive to class before I do, please don't set your sewing machine up just yet. We won't need it until the middle of the day and you will want that space in front of you.
